surface mount
EMI filters

SPECTRUM CONTROL INC.
Signal & Power Integrity Group
With many years of experience in the design and manufacture of filters, Spectrum Control has a unique perspective on EMI and its control. We are now extending our filter expertise to the board level with our introduction of a complete line of surface mount EMI filters. Our family of surface mount inductors, low pass filters, high frequency filters and power filters is designed to offer high performance EMI filtering with a minimal PCB footprint.

Spectrum Control surface mount EMI filters are ideal for a wide range of PCB applications, including automotive electronics, digital A/V equipment, computers, peripherals, telecommunications, switching power supplies and high current bus lines.

ISO 9001 CERTIFIED

www.specemc.com
Spectrum Control’s expertise

Spectrum Control is unique in providing an integrated approach to EMC problem solving by offering customer consulting, diagnostic testing, design and manufacturing services. As a fully integrated manufacturer, we are able to respond to short lead times and develop cost-effective solutions to satisfy your performance and budgetary needs.

test
- Spectrum Control’s Test Facility provides a total solution for your compliance issues
- In-house anechoic chamber and shielding room
- NARTE certified engineering staff
- Tests available for:
  - European emission and immunity regulations (CE Mark)
  - FCC Part 15
  - MIL standard testing

design
- In-house EMI and power conditioning specialists
- Comprehensive computer modeling
- Designs are “in-house” compliance verified
- Custom assemblies:
  - Incorporate EMI filtering, circuit breaker protection, transient suppression, voltage cut-off, power factor correction, harmonic suppression, remote sensing and other options to meet your specific requirements
  - Plug-and-play designs
  - Reduce your time to market
  - Lower your inventory needs

manufacture
- Flexible factories
- Custom designs
- Spectrum Control, Inc. ISO 9001 certified
- Schedule sharing programs available
- Vertically integrated supplier

### Applications
- Cellular telephones and base stations, telecommunication equipment, computer and peripheral equipment, digital AV equipment such as TV, VCR and DVD
- Automotive car electronics, cellular telephones and base stations, microwave transmission, test equipment, DC power supply lines, DC-DC converter, medical equipment
- Power amplifiers, power supplies, temperature and motor controls, high current buss lines and driver circuits

### Features / Benefits
- Easy installation
- Design flexibility
- Performance

### Performance Characteristics
- Capacitance
- Rated voltage
- Max. current range
- Temperature range

### Capacitance
- From 22 to 220,000 pF
- From 22 to 22,000 pF
- From 47 to 1,000 pF
- From 100 to 4,000 pF

### Rated voltage
- 50 to 100 VDC
- 25 VDC
- 50 VDC
- 100 VDC

### Max. current range
- 0.3 to 2 Amps
- 0.3 Amps
- 10 Amps
- 5 to 10 Amps

### Temperature range
- -55°C to +125°C
- -40°C to +85°C
- -55°C to +125°C
- -55°C to +125°C

### Circuit
- Feed thru
- Compact footprint
- Pi

### Surface Mount EMI Filter Selection Guide

**Applications**

- **RSM SERIES**
  - Round Surface Mount Filters
  - Power amplifiers, power supplies, temperature and motor controls, high current bus lines and driver circuits

- **PSM SERIES**
  - Power Surface Mount Filters
  - Power amplifiers, power supplies, temperature and motor controls, high current bus lines and driver circuits

- **HIGH FREQ.**
  - High Frequency PCB Filters
  - Low power digital circuits, FCC and VDE compliant equipment

- **POWER EMI FILTERS**
  - Mini Surface Mount Power Filters
  - Electrical measurement equipment, automotive electronics, industrial electronic equipment, switching power supplies

- **MPC SERIES**
  - Mini PCB Power Filters
  - Switching power supplies, cellular base stations, computer and peripheral equipment, digital equipment, monitor and display units

**Features/Benefits**

- **Easy installation**
  - Universal part orientation increase application speed to the PCB

- **Design flexibility**
  - Compact footprint for densely populated PCBs
  - Tape and reel packaging along with bulk packaging

- **Performance**
  - Excellent performance in GHz applications
  - Eliminates thru-hole filters thus eliminating costly RFI bulkheads

- **Easy installation**
  - Mounts directly to PCB without bracket or plate
  - Built-in standoffs permit cleaning and coating under the filter

- **Design flexibility**
  - Encapsulated for environmental protection
  - Mounts on PCB to begin filtering at the source of the problem

- **Performance**
  - Provides EMI filtering to protect low power digital circuits - helps meet FCC and VDE specifications

- **Easy installation**
  - Efficient EMI control for both plus and minus lines in one component
  - Surface mounted

- **Design flexibility**
  - Combines feed through and multilayer ceramic capacitors with ferrite bead inductors in one compact block

- **Performance**
  - High insertion loss over wide frequency spectrum while handling higher currents

- **Easy installation**
  - Incorporates capacitive and inductive elements in one package

- **Design flexibility**
  - Requires minimal printed circuit board real estate space with both plastic and metal enclosures available

- **Performance**
  - Effective filtering from 100kHz to 30MHz
  - Ideally suited for products that must conform to FCC part 15 regulations

**Performance Characteristics**

- **Capacitance**
  - From 1,500 to 4,000 pF

- **Rated voltage**
  - 100 VDC

- **Rated current**
  - 5 to 10 Amps

- **Temperature range**
  - -55°C to +125°C

- **Circuit**
  - PI & Feed Thru

- **Capacitance**
  - From 68 to 10,000 pF

- **Rated voltage**
  - 200 VDC

- **Rated current**
  - 10 or 20 Amps

- **Temperature range**
  - -55°C to +125°C

- **Circuit**
  - PI & Feed Thru

- **Capacitance**
  - 800 pF

- **Rated voltage**
  - 50 VDC

- **Rated current**
  - 10 Amps

- **Temperature range**
  - -25°C to +85°C

- **Circuit**
  - Feed Thru

- **Insertion loss**
  - Up to 75 dB

- **Rated voltage**
  - 50 VDC

- **Rated current**
  - 7 Amps

- **Temperature range**
  - -25°C to +105°C

- **Current ratings**
  - UP to 16 Amps

- **Voltage ratings**
  - From DC to 250VAC, 60Hz

- **Insertion loss**
  - From 100KHz to 30MHz

- **Temperature range**
  - -25°C to +70°C

- **Leakage current range**
  - 5uA to 0.5mA

- **Circuit**
  - Feed Thru

**Electrical measurement equipment, automotive electronics, industrial electronic equipment, switching power supplies, cellular base stations, computer and peripheral equipment, digital equipment, monitor and display units**

Spectrum Control has the EMC expertise and in-house filter solutions you need to meet worldwide EMC standards.

Our EMC testing services offer you a flexible resource to assist in product development by identifying and correcting EMI susceptibility and/or emission problems. Spectrum Control has a fully equipped EMC test laboratory and experienced engineering staff ready to solve demanding EMC challenges. For a modest daily fee we can test your equipment, determine state of compliance, and work with you in developing a viable solution. It is not uncommon for clients to leave our lab with a prototype in hand.

EMC Lab Highlights
- NARTE Certified Staff
- Semi-anechoic chamber
- Computer controlled instrumentation
- Graphical data presentation in multiple formats
- Fiber optic video monitoring system

Testing Capacities

MILITARY
- MIL-STD-461 A/B/C/D/E
- MIL-STD-1399

AUTOMOTIVE
- CISPR 25 Test Methods

COMMERCIAL
- FCC-Part 15
- RTCA/DO-160 A/B/C/D
- GR-1089-CORE

INTERNATIONAL
- EN55011/CISPR 11
- EN55014/CISPR 14

- EN61000-4-5 Surge
- EN61000-4-6 Conducted RF Immunity
Surface Mount EMI Filters

Three Terminal Chips

Features
- Excellent performance in high current applications
- Non-polar, surface mountable
- Superior filtering characteristics
- Superb ability to withstand transient voltages and surge
- Offers exceptional solderability and resistance to solder heat
- Available in 0603, 0805, 1205 and 1806 body size
- Two amp current rating available
- Available lead free/RoHS Compliant

Applications
- Cellular telephones and base stations
- Telecommunication equipment
- Industrial electronic interface or programmable controllers
- Electronic automotive equipment
- Computer and peripheral equipment

Circuit Schematic

Typical Electrical Characteristics

Capacitance
Range: COG (NPO) 22 pF to 470 pF
X7R 470 pF to 47,000 pF
Y5V 100,000 pF and 220,000 pF

Capacitance Tolerance
- COG (NPO) +50/-20%
- X7R +50/-20%
- Y5V +80/-20%

Temperature Coefficient
- COG (NPO) 0 ±/30 ppm/˚C, -55 to +125˚C
- X7R +/-15%, -55 to +125˚C
- Y5V -25 to +85˚C

Insulation Resistance
- up to 22,000 pF 10000 MΩ
- 47,000 pF 5000 MΩ

DC Resistance
- 0.4 Amp or less 0.3 Ohm max.
- 1 Amp 0.08 Ohm max.
- 2 Amp 0.04 Ohm max.

Rated Voltage
- up to 100 VDC

Rated Current
- up to 2 Amps
Insertion Loss (Per MIL-STD-220)

**SF0603 Series**

- 0.3 and 0.5 Amps
- 1 Amp

**SF0805 Series**

- 0.4 Amp
- 1 Amp

**SF1205 Series**

- 0.3 Amp
- 1 Amp

**SF1806 Series**

- 0.3 Amp
- 2 Amp

Ordering Information

Example: SF0805C221SBNCT

This part number represents a three terminal chip with a body size of 0805 with a COG (NPO) dielectric. The capacitance is 220 pF with a capacitance tolerance of +50%/-20%. Voltage rating is 50 Volts DC. It has nickel barrier, solder plated terminations and a current rating of 0.4 Amp, (400 milliamps). The parts are taped and reeled.

Recommended Solder Temperature Profile

Preheat 220 to 240°C

Cool down

Solder

130 to 150°C

60-120 Seconds

10 max. 120 min.

General Soldering Notes

1. High soldering temperatures and long soldering times can cause leaching of the termination and adversely affect adhesion. These conditions can also decrease capacitance value. Use the above recommended solder temperature cycle.

2. Due to the mechanical characteristic of ceramic composition, aggressive thermal shock will degrade performance. Preheat the assembly before soldering using the above solder temperature profile as a guide.

Recommended Solder Temperature Profile

Preheat 220 to 250°C

Cool down

Solder

130 to 150°C

60-120 Seconds

3-4 120 min.

3. Use mild flux (less than 0.2% by weight of Chlorine), preferable rosin based. If water soluble, wash thoroughly to assure all residue is removed from the underside of components.

4. Ultrasonic Cleaning

When using an ultrasonic cleaning method, the following range is recommended:

Frequency: Not to exceed 28KHz
Output Power: Not to exceed 20W/liter
Cleaning Time: 5 minutes max

Surface Mount EMI Filters
LC & LZ Type Chips

LC Features
- High efficiency EMI surface mount filter
- Ideally suited for high frequency signal lines
- Steep insertion loss (IL) characteristics
- Available in 0603, 0805 and 1206 body sizes

LC Typical Electrical Characteristics
Cut-off
Frequency Ranges . . . . . . . . . . 10 MHz to 220 MHz ± 20%
Rated Voltage . . . . . . . . . . . . 25 Volt
Rated Current . . . . . . . . . . . . 100 mA
IR . . . . . . . . . . . . 10 MΩ min.
Operating
Temperature Range . . . . . . . -40°C to +85°C

LZ Features
- Monolithic construction of dielectric and ferrite materials
- Band stop filter with a choice of rejected frequency band
- Little delay and distortion from original signal wave
- Available in the 0402 and 0603 body sizes

LZ Typical Electrical Characteristics
Center
Frequency Ranges . . . . . . . . . . 10 MHz to 2,000 MHz ± 20%
Rated Current . . . . . . . . . . . . 50 mA and 100 mA
Rejected Bandwidth . . . . . . . . . . 0.5 dec. to 1.5 dec.
Operating
Temperature Range . . . . . . . -25°C to +85°C

LC/LZ Applications
- Telecommunication equipment, fax, modem, and ADSL
- Computer and peripheral equipment
- Digital AV equipment, such as TV, VCR and DVD
- Digital circuit equipment noise countermeasure

Ordering Information

Example: **LC1206M223MANAT**

This part number represents an LC EMI filter chip with a body size of 1206. The cut-off frequency is 22 MHz with a tolerance of ± 20%, voltage rating is 25 Volts DC. It has nickel barrier, solder plated termination and a current rating of 0.1 Amp (100 milliamps). The parts are taped and reeled.

Surface Mount Filter Arrays
SA Series

Features
- The filter's structure minimizes residual inductance with a high self resonant frequency, ensuring large insertion loss in a wide band.
- The common ground electrode built into the chip ensures complete grounding of all lines at the ground on both ends. The filter is designed to control cross talk.
- An optimum constant can be selected from the capacity range of 22-22,000 pF to best suit the frequency.
- Solder plated nickel barrier terminations offer good solderability and resistance to soldering heat.
- Available lead free/RoHs Compliant

Applications
- Noise reduction for DC lines on computers
- Computer peripheral equipment
- Digital TV & VTR
- Cellular telephones
- Automotive electronics

Typical Electrical Characteristics
- Rated Voltage: 25 VDC to 50 VDC
- Rated Current: 0.3 Amps
- IR: 10,000 MΩ Min.
- DC Resistance: 0.3 Ω Max.
- Temperature Range: -55°C to +125°C
- Capacitance Range: 22 pF to 22,000 pF
- Capacitance Tolerance: ±20%

Dimensions in inches (mm)
Surface Mount Low Pass Filters
MSM, SSM, RSM & PSM Series

MSM - Miniature Surface Mount Chip Capacitors
The MSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chips will hardly allow residual inductance and the self-resonant frequency extends to the microwave band. Applications include telecommunication equipment, computer and peripheral equipment and digital AV equipment, medical equipment, DC power supply lines.

- Miniature footprint help in dense circuit configuration
- Rated at 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature ranges of -25˚C to +85˚C and -55˚C to +125˚C
- Available lead free/RoHS Compliant

SSM - Square Surface Mount Filters
The SSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chip series are non-polar and surface mountable with excellent performance characteristics and come in a Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Square mechanical geometry enhances SMT soldering
- Rated to 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of –55˚C to +125˚C
- Available lead free/RoHS Compliant

RSM - Round Surface Mount Filters
The RSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chip series are non-polar and surface mountable with excellent performance characteristics and come in a Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Round mechanical geometry enhances SMT soldering
- Rated to 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of –55˚C to +125˚C
- Available lead free/RoHS Compliant

PSM - Power Surface Mount Filters
The PSM series filters feature high temperature construction and have current ratings up to 20 Amps. This filter series is non-polar and surface mountable with excellent performance characteristics and come in either a Feed-thru or Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Provides time and costs saving compared to thru-hole filters
- Rated to 20 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of –55˚C to +125˚C
- Available lead free/RoHS Compliant

Technical Notes

- Soldering recommendations supplied upon request
- Reflow temperature limit is 250°C
- Unit weight is approximately 0.4 grams
- Tape and reel packaging available for automated assembly

PSM Recommended Board Pattern

- Solder paste pattern
- Recommended pad, must be able to support continuous signal current
- X = 0.350” minimum for 1 oz. copper (0.036 mm thickness)
- X = 0.200” minimum for 2 oz. copper (0.071 mm thickness)
- For low current (10 Amp or less)
  X = 0.130” minimum for 1 oz. copper (0.036 mm thickness for 10 Amp and 0.5 oz. copper - 0.018 mm thickness for 5 Amp or less)

PSM Recommended Board Pattern
Thru-hole Filters

High Frequency PCB Filters

The economical High Frequency PCB Filter offers electrical characteristics which allow many devices to meet most government and industry specifications for EMI control, while providing good electrostatic discharge protection.

A lossy ferrite filter with a center ground lead is terminated within the filter’s thermoset epoxy body.

The High Frequency PCB Filter offers savings three ways. First is the low cost of the filter assembly. Second is the economy of installation. Three silver plated leads are inserted into holes in a printed circuit board which has a ground path circuit, for conventional flows-soldering with other components. No special mounting plate or brackets are needed and when the holes are placed as recommended in a .062 (1.57mm) thick board, no lead trimming is required. Elimination of hand soldering provides opportunities for improved quality in addition to applied-cost benefits.

A third savings results from placing a filter at the source of an EMI problem, potentially eliminating the need for additional filtering at other points in the circuit.

Features

- Provides EMI filtering to protect low power digital circuits - helps equipment meet FCC and VDE specifications
- Mounts directly to printed circuit board with no bracket or plate for lower applied costs - can be flow soldered with other components
- Encapsulated for environmental protection
- Mounts on PCB to begin filtering at the source of the problem
- Built-in standoffs permit cleaning or coating under the filter

Typical Electrical Characteristics

Current ................. Max. 10A DC; 0.3A RF
Operating Voltage ........ Max. 50 VDC, -25°C +85°C
Capacitance ............. 800 pF min.
Dissipation Factor ........ 0.1 Max.
Dielectric Withstanding Voltage ...... 125 VDC for 5 seconds
Insulation Resistance ...... Min. 100 MΩ at 100 VDC for 2 minutes and 25°C

Direct Current
Resistance ............... 0.002 Ohms Max.
Minimum No-Load
Insertion Loss ............ Per MIL-STD-220 at 25°C; PCB mounted, 50 Ohm strip line
3dB @ 8 MHz
10dB @ 25 MHz
15dB @ 50 MHz
20dB @ 100 MHz-1GHz

Mini Surface Mount Power Filters
MSP Series

Features
- Designed for 10A DC power lines
- Offers high insertion loss in a wide frequency band by combining feed through capacitors, multilayer ceramic capacitors and ferrite bead inductors with high self resonance frequency.
- Compact EMI package with plus and minus lines

Applications
- Electronic measuring instruments
- Industrial equipment
- Automotive electronics
- Switching power supplies
- DC-DC converters

61-MPC Series
Rugged construction design enables parts to perform in industrial environments. The 61-MPC series is ideally suited for products that must conform to FCC part 15 regulations. Agency approvals: UL recognized, CSA certified, TUV approved (tested and found to be in accordance with VDE 0565 Part 3). Applications include:

- Personal computers and peripherals
- Measuring instruments
- Home appliances and vacuum cleaners
- Monitor and display units
- Switching power supplies
- Available lead free/RoHs Compliant

11-MPC Series
Power filters are available in PCB mount, bolt-in, fast-on tab or solder lug. The 11-MPC series is ideally suited for products that have been limited board space and require a low cost alternative. Available in both metal and plastic cases. Applications include:

- Personal computers and peripherals
- Digital equipment
- Measuring instruments and medical equipment
- TV & VCR monitors and display units
- Available lead free/RoHs Compliant

MPC-010/-015 Series
The compact design of the MPC-010 and -015 series power filters integrates a feed thru capacitor, multilayer ceramic capacitor and ferrite bead inductors. This series is ideally suited for dense PCBs and where both positive and negative lines have reduce EMI in one housing. Applications include:

- DC power lines on industrial equipment
- Measuring instruments
- Home appliances and vacuum cleaners
- Monitor and display units
- Switching power supplies
- Available lead free/RoHs Compliant
